LIMETOWN SUMMARY

Limetown is a horror & sci-fi podcast created by Two-Up Productions that began airing during the summer of 2015. It focuses on Lia Haddock, an investigative journalist with the fictional station American Public Radio, in her search for the truth about what happened to the scientific settlement of Limetown, Tennessee. In 2004, all 327 inhabitants of the town vanished without a trace after a burst of strange activity. However, her interest is far from simple curiosity, as her uncle is among the missing citizens.
