

4th Grade Ecosystems Research / Computers / Library

POSTER DIRECTIONS

Spring Trimester 2014

Groups must work together to create a map of a new zoo. Each group member on a team is responsible for designing the part of the zoo that represents the ecosystem they researched. We will provide you with the poster paper. You and your team can use any combination of artwork to create a zoo map. You can use, but are not limited to, pencils, markers, crayons, collage and computer printouts (i.e. for labels, map key, etc.) may also be used in your creation.

The zoo poster needs:

- a name
- location (city and state)
- key to ecosystems/area in zoo
- key for animals
- key to other zoo services (food, bathrooms, shopping, etc)
- must be colorful
- creative
- neat
- signs, labels and keys may be handwritten or a computer can be used to design these elements
- you may use photographs printed from the computer but you must include a works cited list of URL's/links for all pictures used on your map.
 - How to do this: copy and paste the url/link from the address bar for the the image into a word document. Be sure to save this document in a folder so you can add additional url's to it.
 - This works cited form must be neatly taped to the back of the poster.
- All team members but have their first and last name listed in the lower right hand corner, homeroom section must also be listed. Each team member must also list the ecosystem that they research
 - For example:
 - Jim Smith – Desert
