

6th Grade PBL – Country Study: Asia

Many countries on the continent of Asia are currently in chaos. Many of the countries are at war with their own people or with other countries. As American students we are sheltered from much of this. Meanwhile children just like us live in these countries and are exposed to radically different lives. In an effort to become well rounded citizens of our own country it is important for us to understand more about our world and the events taking place in it. It is also important to learn that our world is large and beautiful. The question you are to answer is: In the country you have chosen, what is beautiful, amazing, wonderful and worth visiting? Present evidence in text and pictures in a travel brochure to support your argument.
